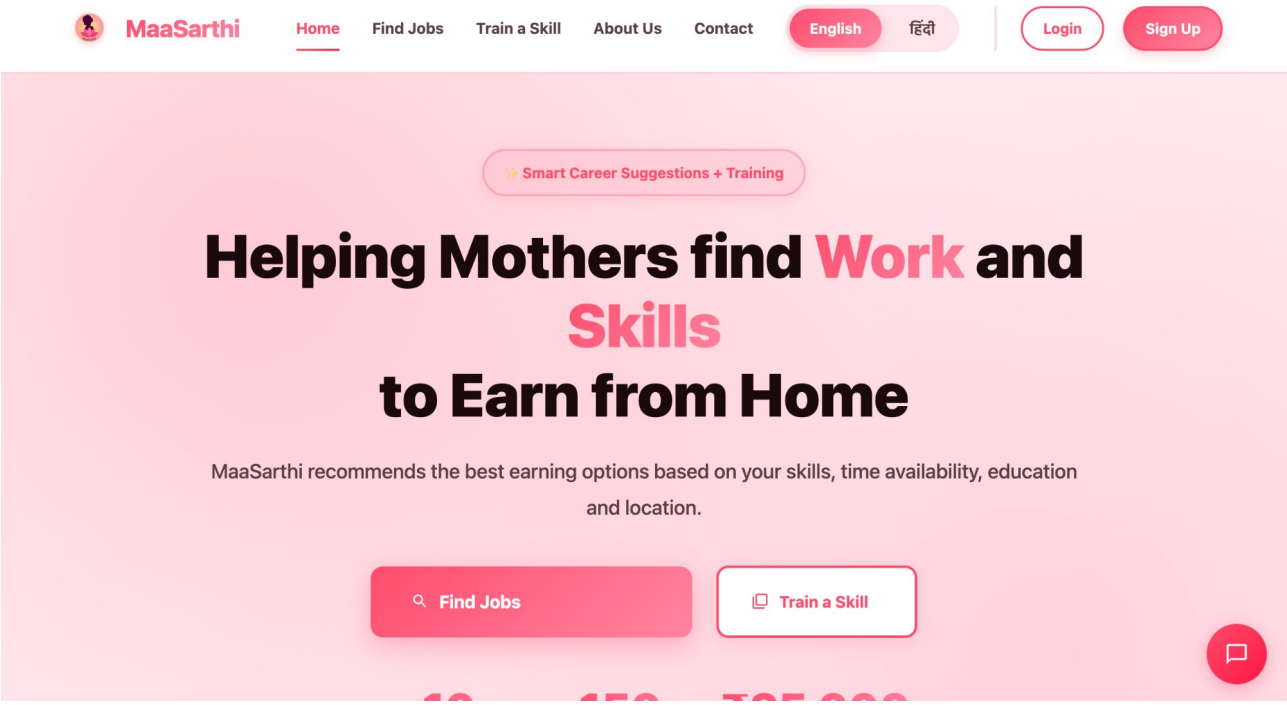
MaaSarthi

AI-Powered Career & Skill Development Platform for Indian Women

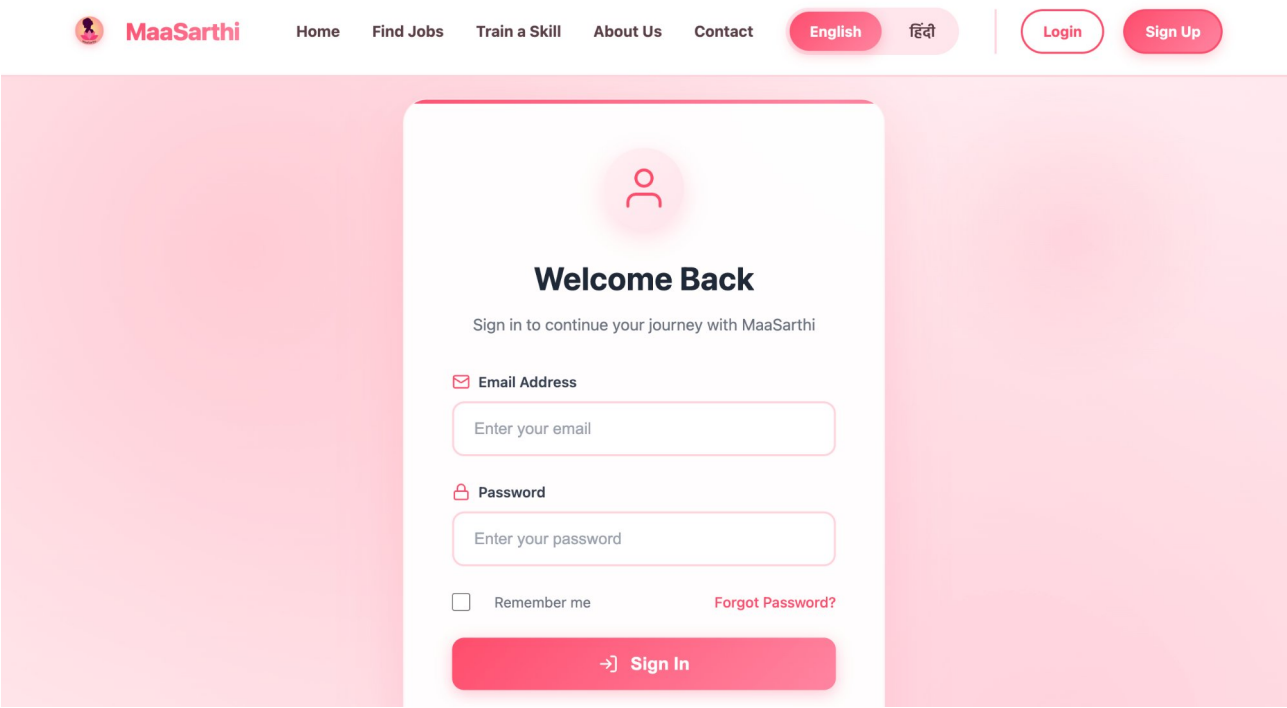
User Interface Design - Prototype Screens & Key Features

Figure 1 - Home / Landing Page



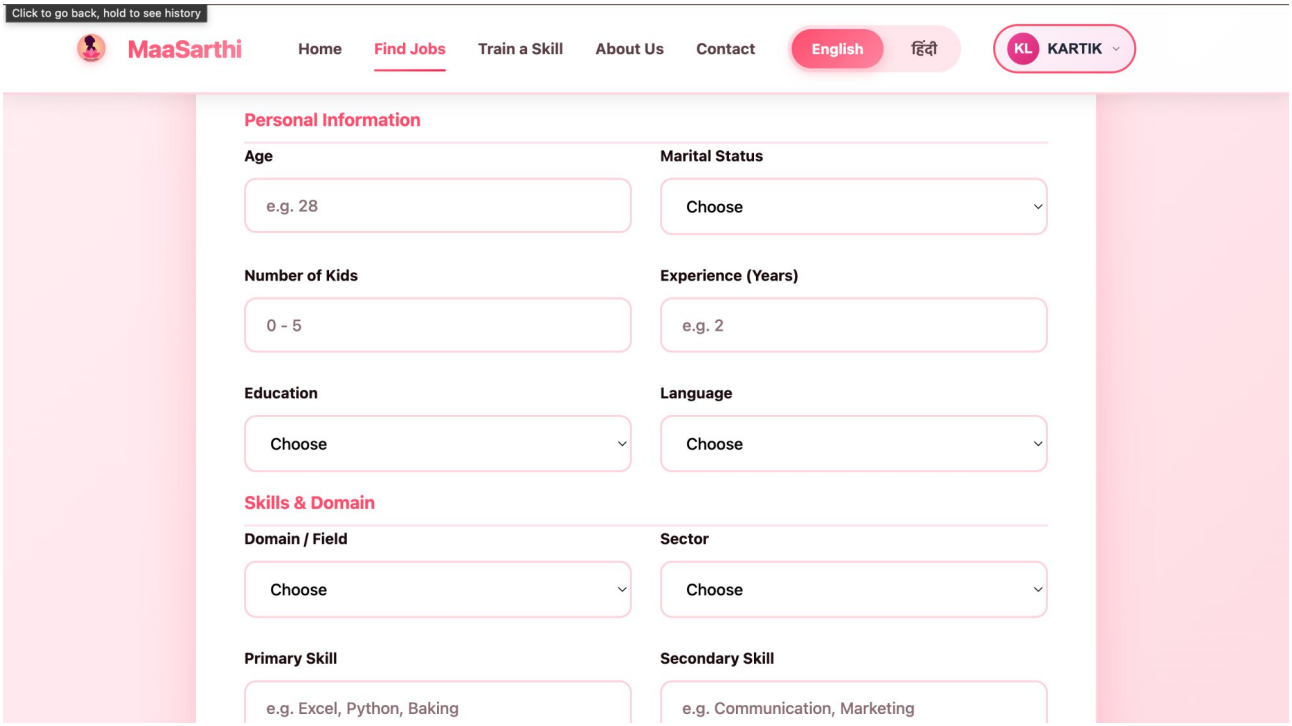
- **Empowering headline:** "Helping Mothers find Work and Skills to Earn from Home" communicates the mission instantly.
- **Dual CTA buttons:** "Find Jobs" and "Train a Skill" give users two primary paths upfront, reducing decision friction.
- **Bilingual toggle:** English/Hindi language switch in the navbar ensures accessibility for regional users across India.
- **Live stats banner:** Impact numbers build trust and social proof on first visit.
- **Floating chatbot:** Persistent chat icon (bottom-right) ensures AI help is always one click away.

Figure 2 - Login Screen



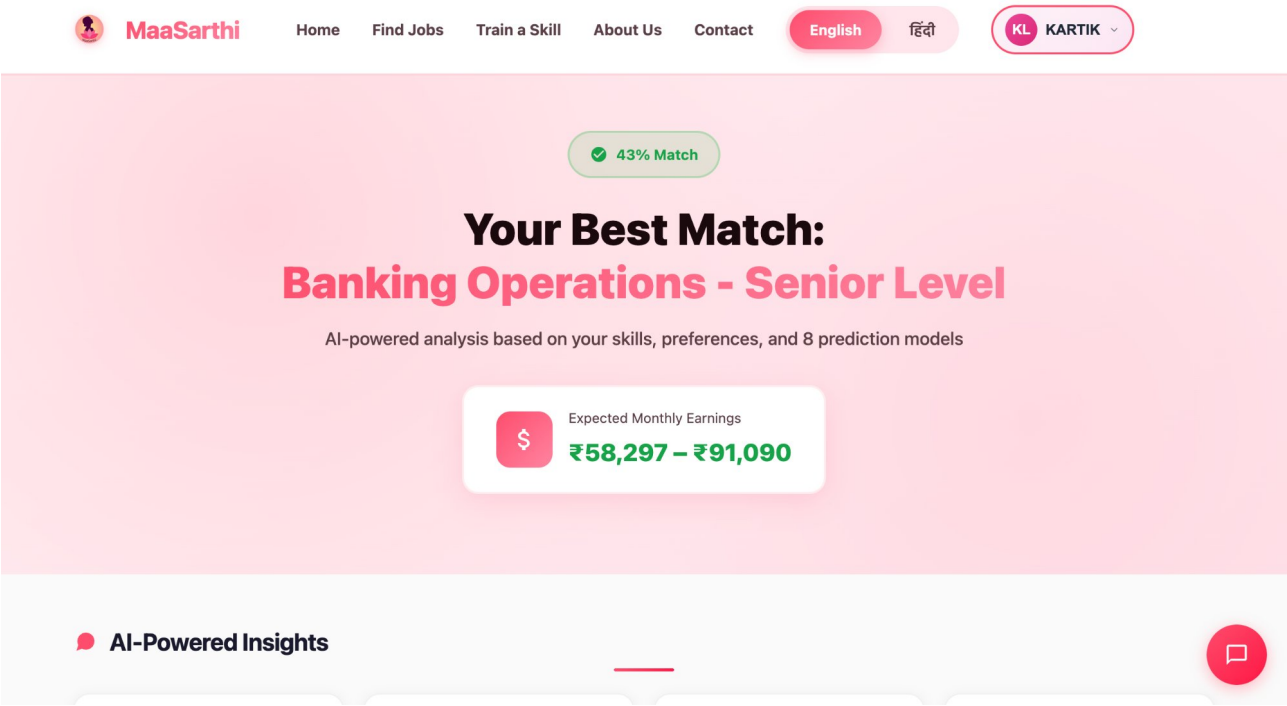
- **Clean centered layout:** White card on soft pink background focuses attention and reduces cognitive load.
- **Icon-labeled fields:** Email and password fields use recognizable icons, improving scannability for low-literacy users.
- **Remember me + Forgot Password:** Both UCD essentials present - reduces friction for returning users.
- **Full-width Sign In CTA:** Prominent pink button with arrow icon creates a clear, accessible call to action.
- **Consistent branding:** Same navbar, logo and color palette as all screens - reinforces brand trust.

Figure 3 - Job Search Form (Personal Info & Skills)



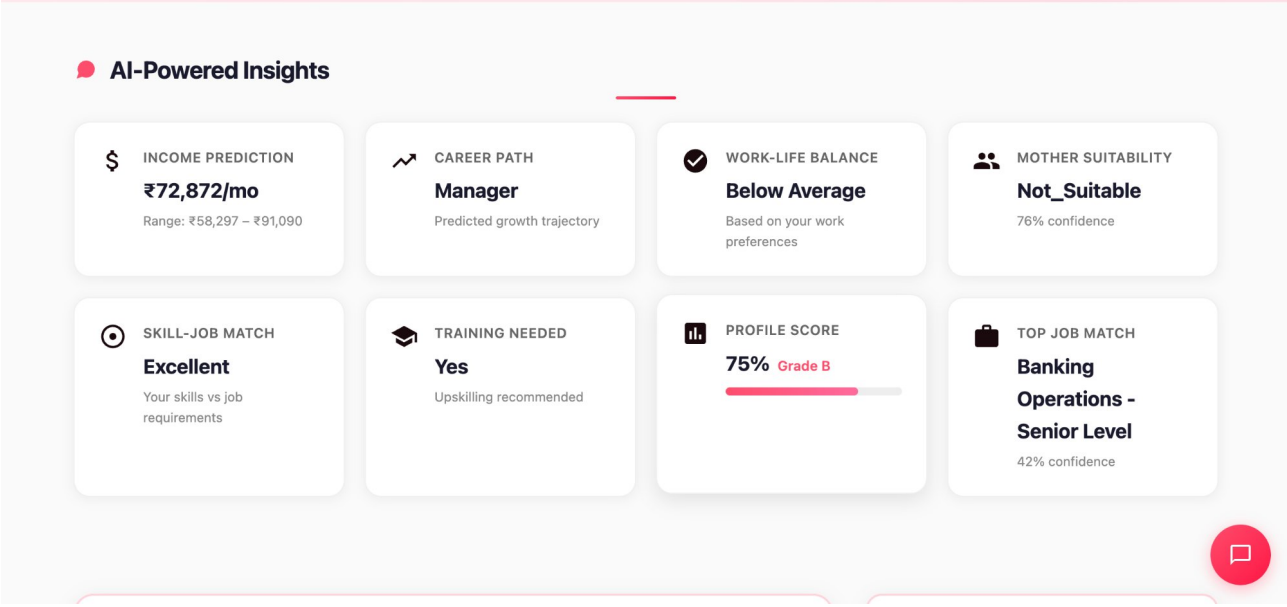
- **Two-column layout:** Side-by-side fields maximize form density without clutter.
- **Contextual placeholders:** Hints like "e.g. 28" and "0-5" guide users unfamiliar with form inputs.
- **Segmented sections:** "Personal Information" and "Skills & Domain" headings break the form into digestible parts.
- **Dropdown selectors:** Education, language, domain, and sector dropdowns prevent invalid input and aid low-literacy users.
- **Logged-in user shown:** Avatar in navbar personalizes the experience and confirms session state clearly.

Figure 4 - AI Job Match Result Screen



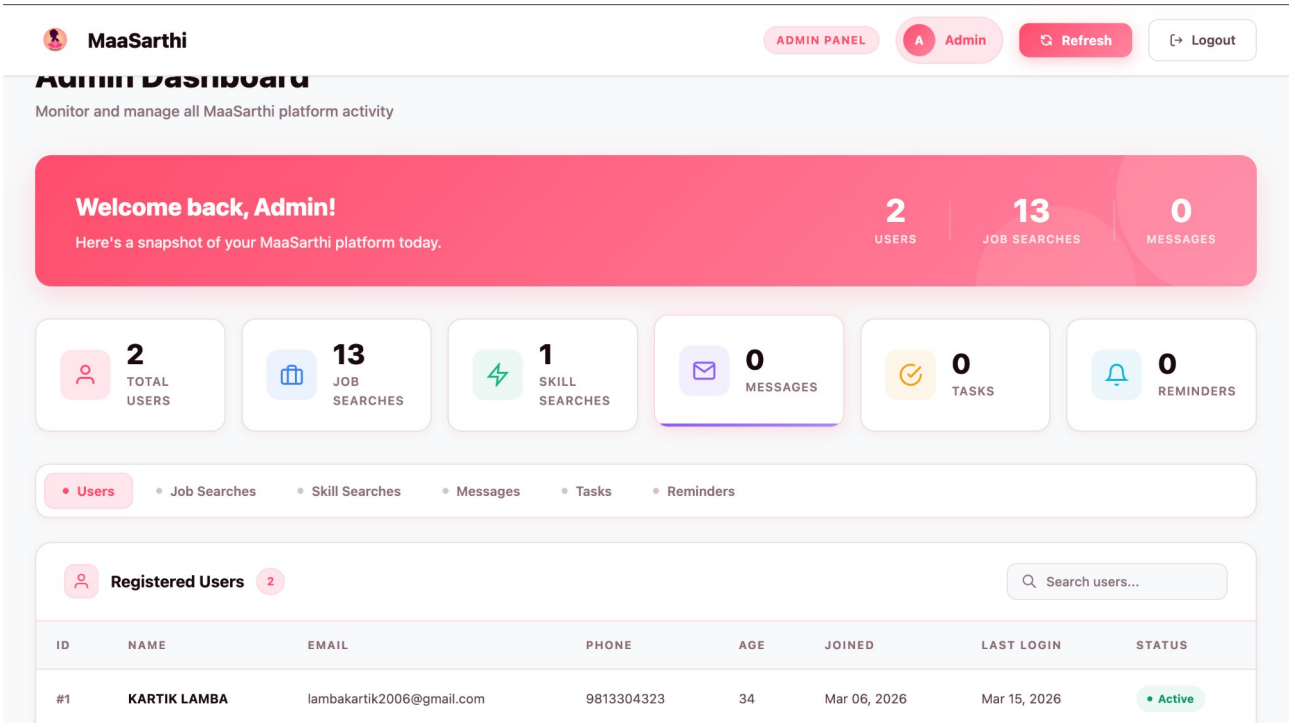
- **Match confidence badge:** "43% Match" pill gives users an instant, quantified sense of recommendation accuracy.
- **Bold best-match reveal:** Large typography for the job title makes the AI result unmissable and motivating.
- **Salary range card:** Expected monthly earnings (Rs.58,297 - Rs.91,090) empowers users in salary negotiation.
- **Multi-model backing:** "Based on 8 prediction models" builds user trust in AI reliability and depth.
- **AI Insights section below:** Scrollable breakdown provides granular model-by-model transparency.

Figure 5 - AI-Powered Insights (8 ML Models)



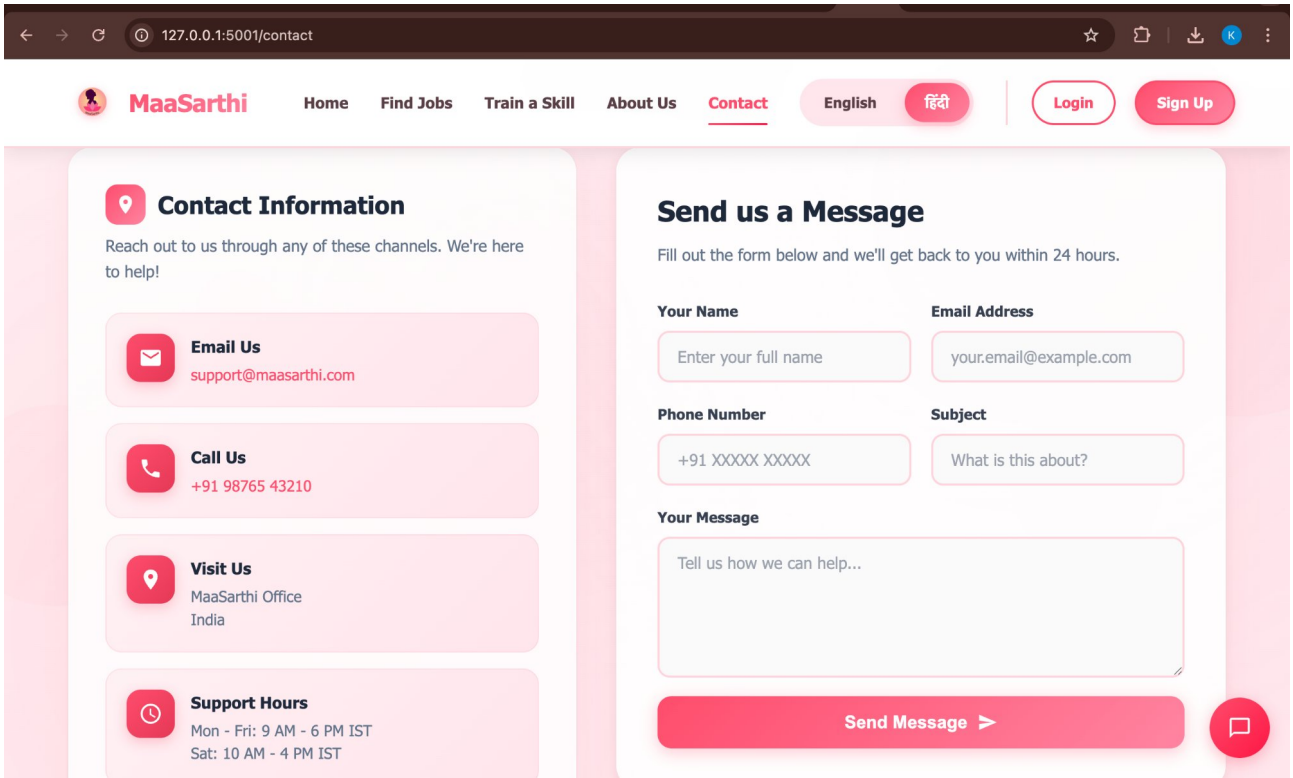
- **8 insight cards:** Income prediction, career path, work-life balance, mother suitability, skill match, training needed, profile score, top job - all at once.
- **Profile score grading:** 75% Grade B with a progress bar gives users a gamified sense of profile completeness.
- **Mother Suitability model:** Unique to MaaSarthi - evaluates job fit specifically for mothers, absent in mainstream platforms.
- **Training recommendation:** "Training Needed: Yes" proactively guides users toward upskilling opportunities.
- **Confidence percentages:** Every card shows model confidence (e.g. 76%), making AI decisions explainable and trustworthy.

Figure 6 - Admin Dashboard



- **Real-time platform stats:** Users, Job Searches, Skill Searches, Messages, Tasks, Reminders all visible at a glance.
- **Tabbed data views:** Six tabs allow focused, clutter-free management of each data category.
- **Registered user table:** Full user details with name, email, phone, age, join date, last login, and status.
- **Active status badges:** Green "Active" badge provides quick health monitoring of the user base.
- **Refresh & logout controls:** Admin-specific navbar with Refresh button ensures live data without full page reload.

Figure 7 - Contact Page



Note: The phone number (+91 98765 43210), email (support@maasarthi.com), and address shown in this screen are placeholder/dummy values used for UI demonstration purposes only. These are not real contact details.

Two-panel layout: Contact information on the left and message form on the right give users two interaction modes simultaneously.

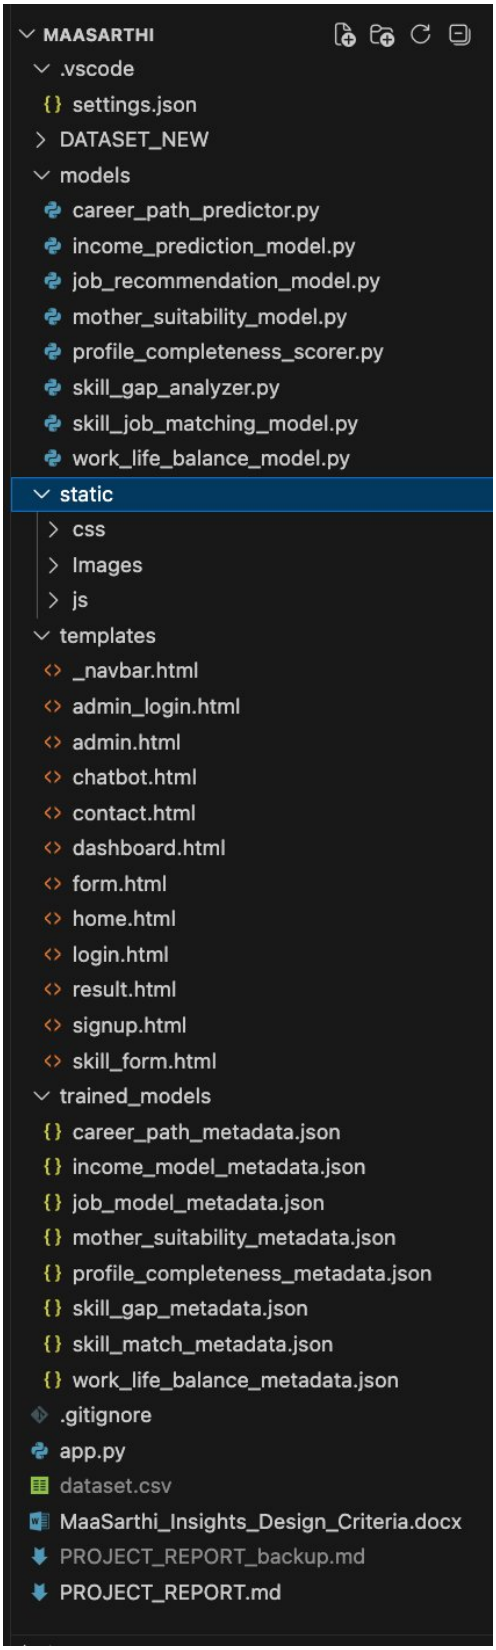
Multiple contact channels: Email, phone, physical address, and support hours are all listed, catering to different user comfort levels.

24-hour response promise: "We'll get back to you within 24 hours" sets clear expectations and builds user confidence.

Structured contact form: Name, email, phone, subject, and message fields with clear placeholders make submission effortless.

Prominent Send CTA: Full-width pink "Send Message" button with arrow is impossible to miss, encouraging user action.

Figure 8 - Project File Structure (VS Code)



■ **8 dedicated ML model files:** career_path_predictor, income_prediction, job_recommendation, mother_suitability, profile_completeness, skill_gap_analyzer, skill_job_matching, work_life_balance - each a separate maintainable module.

- **Trained model metadata:** 8 JSON metadata files in trained_models/ store configuration, enabling reload without retraining.
- **Modular CSS architecture:** Separate CSS files per page keep styles organized and scalable.
- **Full template coverage:** 11 HTML templates covering every user journey from home to admin.
- **Single-file Flask app:** app.py as central entry point keeps routing and logic consolidated for easy deployment.

Disclaimer / Note to Evaluator

The UI/UX screens presented in this document represent the current prototype state of MaaSarthi as of the submission date. The final version of the platform may differ visually and functionally, as the project is actively under development. Several aspects are planned for improvement, including enhanced animations, additional pages, refined mobile responsiveness, expanded language support, and further AI feature integrations. Some design elements, contact details, and data shown across screens are placeholder/dummy values used solely for demonstration purposes. The core architecture, ML pipeline, and UCD principles described herein accurately reflect the project's implemented foundation.
